ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: MATERIALS AND METHODS FOR INDUCTIONS OF IMMUNE TOLERANCE

(57) Abstract: The invention provides methods of inducing immune tolerance to target antigens in individuals seropositive for cer-
tain infectious agents by administration of epitopes derived from those infectious agents. Epitopes derived from viruses which carry
homologues of interleukin 10 (IL-10) in their genome, such as Epstein Barr virus and cytomegalovirus, are particularly suitable for
these purposes. Particularly preferred is the use of the EBV LMP1 protein and epitopes thereof.
